

# Aircraft present, introduce and advertise brands... ...on the ground and in the air.

**With a new aircraft livery, attraction is guaranteed:**

- For brands or special events
- For a long time or short time period
- 360 wrap or partial applications
- Adhesives, aircraft paintings, or a combination of both
- 3-D Animation

We are your creativity and technology partner and are experienced with aircraft surface applications. We apply aircraft paintings, print decals, placards, and paint schemes directly to the airplanes' surfaces.

## Our wide range of services include:

- Design: from the very beginning, our designs emit a striking impression.
- Preparation for printing including carefully checking all aspects of the aircraft from the smallest to the largest.
- Printing on high-tech foils in our own print shop which are lighter than a new coat of paint and will last as long.
- We only use special adhesives from the market leader 3M that come with a warranty. These special adhesives are trouble-free and are as smooth as a coat of paint so that there will be no resistance; leading aircraft manufacturers, the Civil Aviation and the Federal Aviation Authority have given permission to use this technology on aircraft. On all our finished projects this technology has been used and we have received many compliments. Safety is never compromised.
- Punctual delivery and / or painting anywhere in the world.... We can apply the special adhesives even during down times and plan our work with scheduled aircraft maintenances thereby saving you money and precious time

**Aircraft applications and aircraft paintings are our specialties. Our clients are airlines that carry not only passengers and cargo but also messages throughout the world. As an aircraft design specialist and multi-award winner we put lots of importance to our process, products and systems in order to always obtain perfect results.**

Good results in competitions and our partners' references confirm our success:

- Selected from a list of various international companies we received first price in Planpictures Ranking "Best Aircraft Design of 2010."
- Our partner, Turkish Airlines received with a B 737-800 designed by us the Silver Stewie Award for "The Best International Recognition / Motivation Event"
- Various Airlines have acknowledged our work by letting us use them as our references.

**Whether by regular flights, cargo, tour operators or special events such as the World Basketball Championship in 2010, we always know how to impress by using attractive ideas. In addition to our full service range we also enjoy working with many of our partners throughout the world.**
